Our Mission
The University of Zurich is committed to generating and expanding scholarly understanding through innovative research. We support and encourage our members in their research activities and foster a supportive environment for junior scholars.

Mission Statement, University of Zurich

The division Research and Academic Career Development addresses three groups:

Researchers
We inform and advise researchers and junior scholars on matters concerning research funding and fellowships for junior academics. We offer support and encourage collaboration with partners from industry, thus contributing to the transfer of technology.

Executive committees
We support the executive board of the university, the faculties and the institutes in planning and carrying out measures that foster research and career development.

General public
We are active in communicating research topics to an interested public.

Funding for individuals
We provide junior researchers with information on funding opportunities and offer advice.

From a PhD thesis to a professorship: Besides employment opportunities at the university, external funding is available to scholars at every stage of their academic career.

Forschungskredit
The Forschungskredit of the University of Zurich is a fund established to support junior academics working on their PhD thesis or a postdoctoral research project.

International grants
Junior researchers can work at a research institute abroad thanks to grants from the Swiss National Science Foundation (SNSF) and the European Marie Curie Fellowships.

Ambizione
Ambizione funding from the SNSF is directed toward junior researchers who would like to carry out independent research at a Swiss university.

Funded professorships
An SNSF Professorship or an ERC Starting Grant gives junior scholars the opportunity to establish themselves as innovative researchers.

Funding for projects
We provide information about the various funding opportunities and assist researchers with their funding applications.

Alongside the basic funding opportunities at the university, researchers can explore the various opportunities offered by external organizations.

National Funding
The office Funding for Individuals and Projects provides information about national foundations, especially the Swiss National Science Foundation (SNSF).

www.researchers.uzh.ch/support

EU Programs
Euresearch Zurich provides comprehensive information and project management support about both EU and other international research programs.

www.euresearch.uzh.ch/about

Technology transfer
We facilitate collaboration between researchers and business partners from both the private and public sector.

Researchers at the University of Zurich and its associated hospitals have benefited from a growing interest on the part of business partners. The office Unitectra fosters this relationship by assisting in negotiating and drafting contracts, managing intellectual property (patents, brands, copyrights) and implementing research results in the world of business (licenses, spin-off companies).

www.unitectra.ch and www.spinoff.ch

Academic careers
We are dedicated to creating the right environment for junior researchers and offer comprehensive information about academic careers.

The University of Zurich believes that its junior researchers should have ideal working conditions and excellent career opportunities. This overarching idea shapes both visions and strategies concerning academic careers.

www.researchers.uzh.ch/juniorresearchers

Research priority programs
We support and coordinate interdisciplinary research programs.

Research priority programs facilitate collaboration in significant areas at the international level and contribute to sustained progress.

Faculties
The faculties define their own research priorities, thus underscoring their significance in a particular field.

URPP
The University Research Priority Programs (URPP) are interdisciplinary and create networks between faculties.

NCCR
The National Centers of Competence in Research (NCCR) are committed to strengthening the position of Switzerland as a place of research.

Centers of Competence
The Centers of Competence at the University of Zurich are academic networks that enable researchers to consolidate their work in accordance with strategic goals.

www.uzh.ch/research

Information about research projects
We encourage open dialogue between academia and the general public on research topics at the university.

What are scientists investigating at the University of Zurich? Who are the people behind the projects? The research database allows researchers to easily inform the general public about their work.
